

# BRITISH AIRWAYS ENGINEERING

To Airbus Industries

Dear Sir/Madam

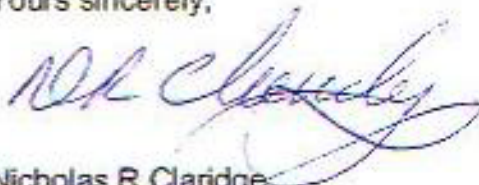

In order that we maintain our position as the UK's largest Airline operator we would like to recommend **Precision Profiles** as the UK's Airbus licence.

Precision Profiles have for a number of years supplied aircraft tooling and ground support equipment in service of our various tooling programmes. In addition to these Precision Profiles has also contributed significantly towards our goals regarding approved vendor status. This has been achieved through our preferred supplier programme and the continual demonstration of Quality, Technical Support and On Time Deliveries.

Though my capacity as British Airways Airbus Supplies Manager I have no hesitation in recommending Precision Profiles as a Licensee who adds real value to our operation. I find their integrity, commercial awareness and above all their Technical Support to be of the highest standard.

I look forward to working with Precision Profiles both now and in the future to come, without their unbridled support we could not meet the expectations of our customers and service the markets we work in.

Yours sincerely,

Nicholas R Claridge
