To Whom It May Concern

Dear Sir

In order that we maintain our position as the largest third party MRO in the world it is imperative that we have the total support of all our suppliers.

Precision Profiles have for a number of years supplied aircraft tooling and ground support equipment in service of our Airbus and Boeing programmes. In addition to these Precision Profiles has also contributed significantly towards our approvals for Snecma and Rolls Royce Engines.

In last 12 months Precision Profiles have risen from being an approved supplier of aircraft tooling to our preferred supplier. This has been achieved through our preferred supplier programme and the continual demonstration of Quality, Technical Support and On Time Deliveries.

Though my capacity as Supplies Manager I have no hesitation in recommending Precision Profiles as a supplier who adds real value to our operation. I find their integrity, commercial awareness and above all their Technical Support to be of the highest standard.

I look forward to working with Precision Profiles both now and in the future to come, without their unbridled support we could not meet the expectations of our customers and service the markets we work in.

Yours sincerely,

Roger Whyte
Supplies Manager
